Looking for something that isn't in this book?

Different species; custom mouldings & millwork patterns; special jambs and door parts — we can get them, or at least point you in the right direction.

Here are some questions to ask your customer:

1. What are they using the material for?
2. What appearance/species/grade do they want?
3. How much/many do they need? (Use the table on page 5 to convert sq. ft. to LF)
4. What lengths will they use? More flexibility = better availability.
   Do they have a cut list?
5. Do they need to match an existing pattern *exactly*? "Close enough" saves money.

SQUARE FOOT TO LINEAL FOOT COVERAGE ESTIMATOR

This estimator helps you determine the lineal footage needed for your paneling, flooring, or ceiling project.

Find the face width below that matches the material you are using. Multiply the "Area Factor" by the square footage you need to cover (length x width x factor). Result is the minimum lineal foot quantity of material you need. Remember to add 10% to this calculation to allow for waste and trim!

FACE WIDTH	AREA FACTOR
3	4
3 1/16	3.92
3 1/8	3.84
3 1/4	3.69

WEST COAST LUMBER STANDARD GRADING RULES #17

FINISH
ALL WEST COAST SPECIES (EXCEPT CEDAR)
VG, FG OR MG, KD - 2" AND THINNER - 2" AND WIDER

101. FINISH is customarily shipped kiln dried and surfaced four sides. Grade descriptions are based on a piece 8" wide and 12' long. The number of characteristics in larger or smaller pieces may vary in proportion to the size of the piece.
Pieces of FINISH 5" and narrower are graded from the best face and both edges. Pieces 6" and wider are graded from the best face and one edge.
There are two grades of FINISH: "C & BTR" and "D."
Unless otherwise specified, pieces are VG, FG or MG at shipper's option.

101-c. "C & BTR"-VG, FG or MG FINISH.
This grade includes the highest type products produced from the clear portion of the log. FINISH of this grade is recommended and widely used for interior trim and cabinet work with natural, stain or enamel finishes where finest appearance is important.

Characteristics and limiting provisions are:
Medium stained sapwood. Heart stain firm.
Short splits in not more than 5% of the pieces.
Small seasoning checks, well scattered.
Occasional very light skips on edge or back.
Light torn or raised grain.
Two small, sound, tight knots or equivalent smaller, or a small pitch streak or four small pitch or bark pockets or equivalent smaller.
Warp - light in occasional pieces.
A 3" cutout 3' or more from either end of pieces 12' and longer is permissible in 5% of the shipment if the piece is otherwise of high type.

ALL MATERIAL USED IN EXTERIOR APPLICATIONS MUST BE PAINTED/SEALED ON ALL 4 SIDES AND END CUTS.
ALL SPECIFIED-LENGTH ORDERS SUBJECT TO AVAILABILITY AND SUBSTITUTION AT THE TIME WE FILL YOUR ORDER.
ALL SOLID WOOD ITEMS ARE PLANER-FINISHED AND SHOULD BE SANDED BEFORE STAINING OR FINISHING.
WE CANNOT ACCEPT CLAIMS ON MATERIALS THAT ARE FINISHED WITHOUT SANDING.
ADVANCED NOTICE APPRECIATED FOR WILL CALLS. SAME-DAY WILL CALLS MAY HAVE TO WAIT FOR PICK-UP.
